ANCHORAGE SCHOOL DISTRICT
ASDR 2015-2016-14
AS AMENDED

RESOLUTION ON BOARD GUIDANCE ON CAPITAL PLANNING

WHEREAS, The Anchorage School Board provides strategic direction to the District and the Capital Improvement Advisory Committee (CIAC) to assure the efficient and effective use of capital resources and the optimal learning environment for students and teachers. The Board has an obligation to make this direction clear to the public and give notice to the affected schools and communities; and

WHEREAS, the Board accomplishes this through board policy and by issuing annual guidance to the administration that defines or reaffirms the Board's priorities and intent for the 6-Year Capital Improvement Plan (CIP); and

WHEREAS, for more than two decades, the district experienced relatively steady growth in student enrollment. From 1988-89 to 2010-11, enrollment increased by about 25%. When a district has steady growing enrollment, it is appropriate to replace schools as they reach the end of their useful life and to plan to build new schools to accommodate the growth; and

WHEREAS, there are three significant reasons to reconsider the school replacement model at this time.

First, for the past 5 years, the district has experienced flat to declining enrollment. From 2010-11 to 2015-16, enrollment was down 2%. While predicting the future is very difficult, there is a general belief that flat or slightly reduced enrollment is more likely in the foreseeable future than steady growth. If the state does not come to grips with its fiscal situation, large reductions in enrollment may occur.

Second, the declines in enrollment have caused the district to have some schools that are under utilized, that is, where the school capacity is significantly larger than the student population. The Board recently adopted the goal of average utilization of between 90% and 100%. Elementary schools on average currently meet this goal but Middle and High schools are on average underutilized.

Third, in 2015, the Alaska Legislature suspended the bond debt reimbursement program until 2020. This nearly triples the cost to the Anchorage taxpayers of constructing and maintaining our schools; and

WHEREAS, because of flat enrollment, some unused capacity, and no debt reimbursement from the state until 2020, it is the appropriate time to reconsider the strategic direction of the district's capital program.

NOW, THEREFORE, be it resolved, for preparing the 2016-22 Anchorage School District Six-Year Capital Improvement Plan and for future capital planning, the Anchorage School Board provides the following guidance to the administration;

*** 2016-2020 HIGH PRIORITY SCHOOL COMPONENTS**

For the period 2016-20, the District should focus on reducing the amount of deferred maintenance across the District and prioritize life safety, critical building components (roofs, boilers, HVAC) and security in that order. School renewals or substantial replacements should only be undertaken based on substantial need, the need to use prior planning expenditures, or for projects after 2020. This “take care of what we got” strategy is appropriate for the period of no bond debt reimbursement from the state.

*** DATA-BASED ASSESSEMENT**

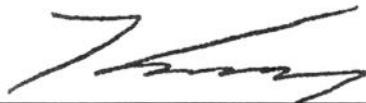

The District should continue to have a data-based assessment process that ranks projects based on the condition of the building from the Facilities Condition Index (FCI) and its suitability as a school using the Educational Adequacy Index (EAI).

*** 2016 SCHOOL CAPACITY STUDY**

The District should conduct an open and transparent study of school capacity and usage in order to make recommendations to the Board. These recommendations may include program changes, boundary changes, school consolidation and/or closure, as well as any other changes deemed necessary and appropriate based on the results of the study. The District may involve the CIAC in any way the two entities deem appropriate. The scope of the study is the entire district and it is not directed at any particular school or community. The District shall give all affected school communities advance notice and a full opportunity to comment. Any recommendation should reflect not only the capital cost savings of the school replacement but also the potential impact on educational outcomes, any closure costs, the affect on operating costs, the impact on the students and the community, that the foundation formula pays less per student in larger schools, and any other relevant factors. The District shall complete this study and make recommendations to the Board no later than November 2016.

PASSED AND APPROVED this 7th day of March 2016.

Introduction and Overview of CIP

I. Introduction and Overview

The Anchorage School Board is responsible for ensuring adequate educational and operational facilities for the students and staff of the Anchorage School District. To fulfill this obligation, the school board regularly engages in comprehensive long-range planning of school facility construction, renovation, and maintenance. On an annual basis, the school board adopts a Six-Year Capital Improvement Plan (CIP) that addresses capital needs, anticipated levels of student enrollment and municipal planning efforts. The CIP delineates the district's construction priorities over a six-year period.

The steps in preparing and approving the Six-Year CIP are listed below:

1. Review school board guidance and policy regarding capital planning.
2. Survey all principals to determine requirements, priorities and space utilization.
3. Collaborate with local demographer to determine enrollment projections by school and grade.
4. Obtain requirements and priorities from the district's internal Capital Planning Committee.
5. Receive administrative recommendations regarding capacity & membership projections.
6. Evaluate the Facility Condition Assessment Program (FCAP) to identify, validate and prioritize aged-out facility systems.
7. Collaborate with the municipality planning department to determine short and long range educational facility needs.
8. Collaborate with the Capital Improvement Advisory Committee (CIAC) and obtain their recommendations.
9. Present CIP to the Municipal Planning and Zoning Commission for recommendations.
10. Present CIP to the Superintendent and school board for approval.
11. Transmit adopted Six-Year CIP to the Anchorage Assembly and to the State Department of Education and Early Development (EED).

This document is divided into four major sections:

- School Facilities
- Capital Improvement Recommendations
- Student Membership Projections
- Current Facilities Utilization

The Six-Year Capital Improvement Plan is a thorough, good faith document intended to convey the Anchorage School District's planned, future investment in its infrastructure. The plan is assessed annually and is subject to modification based on evolving educational needs, changes to facility conditions within the district, and other environmental factors (to include bond passage, budgetary matters, and demographic changes) that influence priorities and contribute to a more informed six-year investment plan.

Municipality of Anchorage

Planning Department Long-Range Planning Division Memorandum

Date: January 9, 2017
To: Mike Nero, Anchorage School District
From: Tom Davis TD
Subject: Status of 2040 Housing Capacity Estimates by School Attendance Area

The *Anchorage 2040 Land Use Plan* project team is still working to follow up on our collaborations with ASD from this past year, to provide you with our estimates of future housing capacity by school attendance area (elementary, middle, high schools). We will provide the data in a format that should enable ASD to translate these future housing capacities into long-term (2040) forecasts of student population projections by elementary, middle, and high school.

While we do not yet have for you any definitive findings as to future housing, following are some initial observations that may be of interest in several attendance areas:

1. The Municipality's long term strategy for community growth as recommended in the draft *2040 LUP* depends on a significant increase in population in the Downtown vicinity and in Midtown. Additionally there is an effort to increase housing opportunity in the UMED vicinity. The *2040 LUP* also indicates approximately 1,000 additional housing units in the northeastern Muldoon area and in the southwestern Kincaid/Jewel Lake area.
2. Initial review of the draft housing capacity findings suggest significant additional housing possible by 2040 in the Central, Romig, Wendler, Begich, and Mears middle school attendance areas. In particular, it seems consistent with long-term land use planning for ASD to retain a middle school site at Central or nearby location to serve the Downtown area, which may see more than 2,000 additional housing units in the 2040 horizon.
3. Initial review of the draft housing capacity findings suggest significant additional housing possible by 2040 in the Inlet View, Denali, Fairview, North Star, and Willow Crest elementary school attendance areas in Downtown and Midtown. The draft estimate is more than 3,000 additional units in these attendance areas. It would be consistent with municipal efforts to facilitate new housing in the Downtown area for ASD to retain the Inlet View Elementary school site for anticipated future increases in population in this area. Additionally more than 1100 new housing units may be added in the combined attendance areas of Creekside Park, Muldoon, Chester Valley, and Susitna. Another 1100 units appear likely in the combined attendance areas of Kincaid, Sand Lake, and Chinook Elementary.

All of these are long-term projections for the 2040 planning horizon. They do not conclude a need for expanding or building new school buildings in the 2023 ASD CIP horizon.

School Facilities

II. School Facilities

The Anchorage School District (ASD) operates and maintains the largest physical plant of any public entity in the state, with over 7.8 million square feet worth approximately \$2 billion. The district has 93 facilities; 86 schools and 7 support facilities. There are 13 alternative and charter school programs that utilize leased facilities. The district has more than 48,000 students and nearly 5,000 staff members.

ASD has 7 (preK-5), 7 (K-5), 7 (preK-6) and 37 (K-6) elementary schools, and two K-8 schools (table A). Aurora, Mt. Spurr, Orion, Ursa Major and Ursa Minor elementary schools are located on Joint Base Elmendorf Richardson (JBER).

ASD has three middle schools grades 6-8, seven middle schools grades 7-8 and eight high schools grades 9-12 (table A).

ASD has 10 charter schools and 12 alternative schools (table A).

Special Education services are offered in all elementary and secondary schools in the district. Some schools support self-contained programs for students with more significant disabilities who require this type of setting. Tyson, Kasuun, Lake Hood, Baxter and Whaley School, are dedicated to serving students with significant disabilities that required intensive behavior support. The district also provides services at our Alternative Career Education (ACE) and Adult Community Transition (ACT) programs for students 18 – 22 who require continued transition services.

In addition, the district operates four state contract programs: Alaska State School for the Deaf and Hard of Hearing, Providence Heights, McLaughlin School and New Path High School. The district also operates special educational programs for students in eight short and long term residential facilities: Bragaw Heights, DeBarr Heights, Humphrey Heights, Jesse Lee Home, Maplewood, McKinley Heights, Providence Heights, and Turning Point Heights.

Capital Improvement Needs

Capital Improvement
Needs

III. CAPITAL NEEDS

The Anchorage School District operates and maintains 93 facilities; 86 schools and seven operational facilities. There are 52 schools over 20 years old and 21 over 50 years old.

To properly identify and prioritize requirements across such a large physical plant, the district has implemented an Integrated Facility Condition Assessment Program (FCAP). In 2009, the district initiated the development of an asset management system to assist in capital planning. Information was collected by Architect and Engineer teams during facility condition assessments utilizing a systematic and consistent methodology. Facility condition assessments have been completed for all district-owned facilities. Additionally, educational program assessments have been completed for all schools except the King Career Center. Facility assessment data is updated routinely as facility condition assessment and construction projects are completed.

Educational program requirements are defined by districtwide educational specifications for elementary, middle and high schools. An Educational Adequacy Index (EAI) determines the ability of a school to meet educational program requirements by evaluating the quantity, configuration, size, and existence of spaces defined by the district's educational specifications. For example, a school may not have enough classrooms to offer health classes, or lack a gymnasium in addition to a multi-purpose room in order to facilitate concurrent lunches and physical activity. The EAI for a facility is calculated by dividing the cost to correct the educational specification deficiency by the replacement cost of the facility. The higher the EAI, the greater the level of educational inadequacies of the facility compared to ASD education specifications.

A Facility Condition Index (FCI) is also calculated to determine a facilities relative condition and estimates the investment cost needed to address aged-out facility systems. It is a percentage index derived from dividing the cost to replace "like" aged-out building component/systems by the facility's replacement cost. The higher the FCI, the greater the level of investment needed to sustain/renew the facility. The FCI can also be applied districtwide to measure the condition and determine the level of annual investment needed to sustain/renew the district's physical plant.

According to the national standard, an FCI less than .05 is considered “Excellent”, .05-.10 is considered “Good” and .10-1.0 ranges from “Fair to Poor”. With an estimated ~\$2 billion Current Replacement Value (CRV) and ~\$280M of deferred unfunded sustainment backlog, the current districtwide FCI is ~0.14.

Best practice within the facility management industry is to re-invest 7% of the CRV annually for Maintenance and Operations (3%), Periodic Renewals (2%), As-Needed Alterations (1%) and Systematic Reduction of Deferred Renewals/Alterations (figure 1). For the ASD, this would equate to \$140M/year; \$60M for Maintenance and Operations, \$40M for Periodic Renewals, \$20M for As-Needed Alterations and \$20M for Systematic Reduction of Deferred Renewals.

Figure 1. National Standard for Facility Investment

Source: 2016 State of Our Schools; America’s K-12 Facilities; 1st Century School Fund, Inc., U.S. Green Building Council, Inc., and the National Council on School Facilities

The FCAP centralizes information on the district’s facility system conditions (FCI) and educational specification deficiencies (EAI). This information is reviewed and validated during routine facility assessments by utilizing systematic, consistent, and repeatable methodologies. The FCAP serves as the basis to determine capital needs, priorities, educational inadequacies, capital costs and is used to develop short and long term capital planning and funding strategies for the district. Current and

forecasted FCAP requirements and costs will be evaluated and prioritized annually based on the following criteria:

- **Category I-1 thru I-3:** year one requirements that address life safety, security, legal compliance, repair damaged/deteriorating facility to prevent loss of the facility, avoid high-cost emergency repairs and capitalize on rapid energy savings
- **Category II-1 thru II-3:** year two requirements that address educational program priorities, repairs less compelling than Priority I and deferred repairs that will lead to a loss of facility, hamper educational program or affect efficient operations
- **Category III-1 thru III-4:** year 3-5 requirements that address facility or site improvements necessary for proper functioning, economic maintenance & suitable appearance of new construction left uncompleted because of inadequate project funding, delayed deferred maintenance that can be postponed, anticipating actions for long-range planning and delayed to be combined with a future project.

Facility condition and educational program assessments highlight the following key considerations of sustaining the district's physical plant.

Building Component Life Cycle: Facility systems only last so long. Roofs deteriorate and leak; heating, plumbing, and ventilation systems wear out; and structural systems age. As components age-out, their reliability exponentially decreases and exposes maintenance and operational budgets to more emergency expenditures and increases the risk of impacting educational programs.

Functional Obsolescence: Over the life of a school, programmatic changes take place that demand updating the facility infrastructure. Current educational delivery methods require more technology and physical layouts that are often different and more flexible than those of 30 to 40 years ago. Additionally, various code changes require updating structural, electrical mechanical systems and improving accessibility for persons with physical disabilities. Moreover, significant renewals often require structural upgrades to meet more stringent seismic codes.

Capacity: the ASD is the largest school district in the state, and while its overall enrollment has been steady in recent years, the geographic distribution of students continues to shift due to the mobility of the state/city population. In order to meet short-term over-capacity situations, the district has 145 relocatable classrooms.

Capital Improvement Recommendations: 2017–23

Capital Improvement
Recommendations: 2017–23

IV. CAPITAL IMPROVEMENT RECOMMENDATIONS:

The recommended six-year capital improvement projects and their estimated project costs are reflected in Table 1. Initial project cost estimates are based on Fiscal Year 2016 DEED Cost Model with 2.5% inflation adjustments for years two through six. Adjustment to these cost estimates may be made in future years to accommodate fluctuations in construction costs and scope of work identified during initial planning or design stages of the projects.

The six-year CIP was developed through collaboration with municipal planners and extensive data-driven analysis by the Capital Improvement Advisory Committee (CIAC) and the district's internal Capital Planning Committee (CPC). The plan considers recent board guidance and policy established in 2016. This plan takes a more aggressive approach in addressing the district's deferred sustainment requirements, foregoes un-necessary large-scale renewals through the state's moratorium on debt reimbursement and addresses the district's top educational program priorities.

Table 2 provides brief descriptions of projects identified in Table 1. Table 3 identifies the agency coordination required for developing property currently managed by the district. Table 4 summarizes information from the FCAP. Table 5 identifies the district's anticipated project delivery schedule of large-scale projects that may be funded through legislative appropriations.

Table 1 - CIP RECOMMENDATION 2017-2022

	Project Type	1	2	3	4	5	6
		2017	2018	2019	2020	2021	2022

Table 2
2017-2022 CIP Project List

Project Title	Scope of Work	Project Cost	CIP Year
Capital Improvement Projects			
West High School/Romig Middle School Library/Counseling Area Seismic Renovation	Replace the entire roof over the Library/Counseling area. The work will include structural/seismic improvements and reconfigure/add space to eliminate relocatable classrooms and relocate counseling offices to the main office area.	\$6,750,000	1
Abbott Loop Elementary School Planning & Design	Planning funding to address code deficiencies; provide sprinkler system for fire protection; replace critically aged components; and address program deficiencies.	\$500,000	2
Inlet View Elementary School Emergent Component Replacement Construction	Design and construction funding to address structural deficiencies; provide sprinkler system for fire protection; replace critically aged components such as exterior window and wall assemblies, boilers, mechanical controls, ventilation, lighting; and improve front office security.	\$6,692,000	2
Wonder Park Elementary School Emergent Component Replacement Construction	Design and construction funding to address structural deficiencies; replace critically aged components such as roof, exterior window and wall assemblies, heating piping, and ventilation; renovate restrooms and enclose open classrooms to address program deficiencies.	\$10,397,000	2
Abbott Loop Elementary School Renewal	Design and Construction funding to address code deficiencies; provide sprinkler system for fire protection; replace critically aged components; and address program deficiencies.	\$20,973,000	3
Romig Middle School Renewal	Design and construction funding to address building improvements as identified in the School Board approved "West High School & Romig Middle School Implementation Phasing Plan (September 4, 2015)."	\$25,565,000	3
Homestead Elementary School Renovation Planning and Design	Planning funding to address code deficiencies; replace critically aged components; and address program deficiencies.	\$500,000	4
Gruening Middle School Emergent Component Replacement Construction	Construction funding to replace aged components such as roof, exterior doors and windows; repair and refinishing exterior; retro-commission the mechanical system; repair paving and drainage; reconfigure bus loop/drop-off to improve safety; and address program deficiencies in special education, science and front office security.	\$10,954,000	4
Mears Middle School Renovation Planning and Design	Planning funding to address code deficiencies; replace critically aged components; and address program deficiencies.	\$500,000	4
Whaley School Design & Construction	Design and construction funding for building improvements to support educational program and for component replacement of aging systems.	\$26,277,000	4
O'Malley Elementary School Emergent Component Replacement Construction	Construction funding to address structural deficiencies; replace critically aged components such as exterior window and wall assemblies, cabinet unit heaters, exhaust fans, mechanical controls, water mains, electrical, lighting; intercom, security system, and septic drain field; renovate main restrooms; and improve front office security.	\$21,269,000	5
Central Middle School Emergent Component Replacement Construction	Construction funding to address structural deficiencies; replace critically aged components such as roof, exterior window and wall assemblies, cabinet unit heaters and interior lighting; and repair paving to improve site accessibility.	\$21,631,000	5
West High School Renewal	Design and construction funding to address building improvements as identified in the School Board approved "West High School & Romig Middle School Implementation Phasing Plan (September 4, 2015)."	\$44,783,000	5
Homestead Elementary School Renewal	Construction funding to address structural deficiencies; replace critically aged components such as exterior window and wall assemblies, cabinet unit heaters, exhaust fans, mechanical controls, water mains, electrical, lighting; intercom, security system, and septic drain field; renovate main restrooms; and improve front office security.	\$21,040,000	6
Mears Middle School Renovation Construction	Design and Construction funding to address code deficiencies; replace critically aged components; and address program deficiencies.	\$47,548,000	6

Table 2
2017-2022 CIP Project List

Districtwide Life Safety & Building Protection Projects	Scope of Work	Project Cost	CIP Year
King Career Center Roof Replacement	Replace the roof over the building. The existing roof is beyond useful life and is failing.	\$4,100,000	1
Muldoon Elementary School Roof Replacement	Replace the flat roof areas of the building and repair gutter around the perimeter of the building. These areas are leaking and have failed.	\$920,000	1
Northwood Elementary School Roof Replacement	Replace the 1987 roof sections that are failing. This work will include structural/seismic improvements.	\$2,650,000	1
Nunaka Valley Elementary School Roof Replacement	Replace the entire roof over the building. The existing roof was installed in 1991 and is failing. The work will include structural/seismic improvements.	\$2,900,000	1
Districtwide Life Safety & Building Protection Projects	Scope of Work	Project Cost	CIP Year
Rogers Park Elementary School Roof Replacement and Ventilation System Upgrade	Replace the entire roof over the building. The existing roof was installed in 1991 and is failing. The work will include structural/seismic improvements. Replace existing cabinet unit ventilators with new centralized heating/ventilation system and improve air flow.	\$10,855,000	1
Student Nutrition Roof Replacement	Replace the entire roof over the building. The existing roof installed in 1989 and is failing. The work will include structural/seismic improvements.	\$2,550,000	1
West High School Roof Replacement and Gym/Auditorium Ventilation System Upgrades	Replace approximately 151,410 square feet of roof. This section of roof was installed in 1987 and 1989 and is failing. The work will include structural/seismic improvements. Replace 1973 Air Handling Units in the gym and auditorium. This equipment is continually failing and has become very difficult to maintain.	\$15,800,000	1
Willow Crest Elementary School Roof Replacement and Ventilation System Upgrade	Replace the entire roof over the building. The existing roof was installed in 1988 and is failing. The work will include structural/seismic improvements. Replace existing cabinet unit ventilators with new centralized heating/ventilation system and improve air flow.	\$11,925,000	1
Districtwide Emergent Projects	Life Safety, Building Component, Energy, & Security Projects	\$37,556,000	2
Districtwide Emergent Projects	Life Safety, Building Component, Energy, & Security Projects	\$7,077,000	3
Districtwide Emergent Projects	Life Safety, Building Component, Energy, & Security Projects	\$18,029,000	4
Districtwide Emergent Projects	Life Safety, Building Component, Energy, & Security Projects	\$32,317,000	5
Districtwide Emergent Projects	Life Safety, Building Component, Energy, & Security Projects	\$51,412,000	6

Original Construction -	Year the facility was built
Last Major Improvement -	Most recent year that a significant improvement was made on the facility
Square Footage -	Facility size based on gross square feet
EAI Evaluation Model -	Designation of metric utilized for the facility's educational assessment of instructional spaces. Unless noted "Special", model is based on Districtwide Educational Specifications (Draft 4/2011) adjusted to population trends, or existing Master Plans.
Deficiency EAI -	A percentage index derived from dividing the cost to correct instructional space's deficiencies by facility's replacement cost
Missing Spaces EAI -	A percentage index derived from dividing the cost to provide the missing instructional space by facility's replacement cost
Total EAI -	A percentage index derived from the summation of the Deficiency EAI and Missing Space EAI
FCI -	A percentage index derived from dividing the cost to correct building component/system needs by the facility's replacement cost

Membership Projections Summary: 2017–18 to 2022–23

V. **Membership Projections Summary: 2017 to 2022**

Forecasting Methodology and Assumptions: The principal method used to project the 2017 through 2022 enrollment is an econometric model which combines the cohort-survival technique with a GIS-enabled database of school age children based on PFD data. For each school and grade there is an underlying statistical relationship derived from comparing historic enrollment with historic cohort survival and PFD counts. Unlike the method used prior to this year, which treated the student body in an aggregate fashion using historical membership data and the applied aggregate rates to each school, this method accounts for historical retention trends for each individual school while reflecting up to counts of eligibility based on PFD data.

The results for each school and grade level projection are then assessed to ensure that the results are supported by underlying historical patterns or, if there is a change in pattern, that the change is supported by shifting demographic or economic factors.

ASD projections contained in this document do not reflect the impact of any major events occurring in the next six years: construction of the natural gas pipeline, opening of ANWR for oil exploration, closure or expansion of military installations; major changes in the state's economic or political structure. It is assumed, however, that oil and mineral exploration will continue in Alaska throughout the decade. It is also assumed that other industry and commercial sectors in Anchorage will continue to track overall economic activity levels and their employment levels will affect ASD membership.

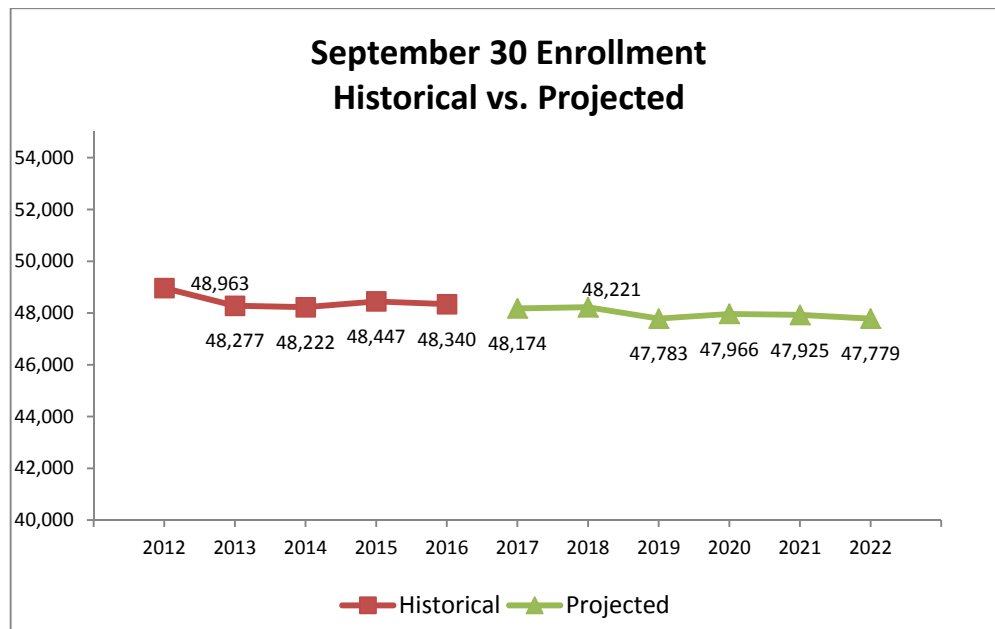

Enrollment Projections: A slight declining trend in student enrollment, experienced from fall of 2015 to 2016, are expected to continue on average over the next five years. Overall decline is due to positive and negative drivers detailed below:

- an increase in the local birth rate in 2011-2015 compared to the prior five years;
- a general decline in past enrollment since the late 2000's;
- a steady decrease in school age population, as reflected by PFD applications since 2013, with a sharper decrease from 2015-2016. This decline is likely due to the number of families whose livelihood remains dependent on the currently declining oil sector who chose to relocate outside of Anchorage.

Summed together, projections are mostly flat with a downward trend in enrollment, but one that is dampened by a few larger than average cohorts moving through the system.

Elementary schools show slight declines in the first two years, followed by a (-1.4%) decrease in enrollment from 2018-2020 due to attrition and recent drops in

corresponding PFD applications. However, elementary school attendance is projected to recover in 2021 and 2022 because of higher birth rates and PFD cohort applications associated with those years. Middle school projections show increases in attendance from 2016-2019 (3%) because of a larger than average cohort moving through past grades, but a -7% decline from 2019-2020 is expected once the cohort passes. A decrease in high schools is expected (-1.4%) from 2016-2019, but will likely see some increases in later years due to the aforementioned cohort moving from middle school to high school. The net effect across all grades is a slight decline (-1.2%) from the fall of 2016 to the fall of 2022.

The overall decreased enrollment in elementary and high schools could drive decreased classroom and staff requirements. The enrollment in middle schools might moderate classroom and staff requirements in the short term, but might eventually decrease classroom staff requirements.

The enrollment projections are a base case that considers past student enrollment, birth data, and school age PFD applications. Overall employment in Anchorage has declined roughly 2% in 2016 and is anticipated to continue to decline at a similar rate this year. Recent declines have prompted the forecast to trend downward on average; however, it is still not fully known how the current economic climate will affect the school age population. The district will continue to monitor employment and enrollment trends, updating projections if a significant deviation from current trends occurs.

Table 6**Projections Summary: 2017 - 2022****District Total by Grade Level**

Note: Intensive special ed students are included.

Current Facilities Utilization

VI. Current Facilities Utilization

DEED Capacity: Alaska Department of Education & Early Development (DEED) calculates allowable space based on Anchorage’s attendance area. Allowable space is calculated based on the total number of students/total gross square footage in the attendance area.

Design Capacity: The district utilizes Educational Specifications for determining the design capacity of a school when planning its renovation and/or replacement. It considers functions, total student seats, support facilities and schedule flexibility.

Program Capacity: The district reports its individual and districtwide school capacities based on how the school “actually” supports their academic and support programs. For example, our proto-typical schools are basically identical in structure, but differ in their Program Capacity because of the nature of programs offered; Kincaid is 510, Russian Jack is 477, and Lake Hood is 469.

Facilities Utilization: Administrators are aware that some programs, or special services, require space beyond the normal classroom capacity. Tables 13-15 provide the schools and administration the number of classrooms, membership, program capacity and number of relocatable units to assist in evaluating the actual number of students that can be housed based on the school’s classroom utilization. Relocatables are not included in determining program capacities.

School Program Capacity Projections: Table 16 lists projected enrollments of all schools over the next six years, as a percentage of program capacity. Those schools at which the projected enrollment is greater than 100 percent are highlighted in bold print.

APPENDIX A

Appendix A provides a list of schools, including charter schools, that have opened, closed or have been replaced as of 1996. It also contains basic information which describes the current status of each school facility, including: the year of original construction with gross square footage, year and description of any additions with gross square footage, as well as demolition and replacement facilities.

Schools that Opened, Closed, or Were Replaced or Renewed Since 1996

	School Name	Year Built or Opened	Year Replaced or Renewed	Year Closed
Opened Since 1996	Alaska Native Culture Charter	2008		
	Aquarian Charter	1997		
	Begich Middle	2007		
	Eagle Academy Charter	2005		
	Eagle River High	2005		
	Family Partnership Charter	1997		
	Frontier Charter	2003		
	Goldenview Middle	1997		
	Highland Tech Charter	2003		
	Kasuun Elementary	1996		
	Kincaid Elementary	1996		
	Lake Hood Elementary	1996		
	Mirror Lake Middle	1997		
	PAIDEIA Cooperative	2015		
	Rilke Schule Charter	2007		
	South High	2004		
	Stream Academy Charter	2016		
	Trailside Elementary	2000		
	Tyson Elementary	1996		
	Winterberry Charter	2005	2015?	
Opened and Closed Since 1996	Village Charter	1998		2004
	Walden Pond Charter	1997		2000
Opened Prior to 1996 and Closed Since 1996	Kennedy Elementary	1962		2000
Replacements Since 1996	Clark Middle	1959	2009	
	Denali Montessori	1950	2004	
	Dimond High	1965	2004	
	Fairview Elementary	1958	1998
