2018 COVER: Turnagain Elementary School

ANCHORAGE SCHOOL DISTRICT
ASDR 2015-2016-14
AS AMENDED

RESOLUTION ON BOARD GUIDANCE ON CAPITAL PLANNING

WHEREAS, The Anchorage School Board provides strategic direction to the District and the Capital Improvement Advisory Committee (CIAC) to assure the efficient and effective use of capital resources and the optimal learning environment for students and teachers. The Board has an obligation to make this direction clear to the public and give notice to the affected schools and communities; and

WHEREAS, the Board accomplishes this through board policy and by issuing annual guidance to the administration that defines or reaffirms the Board's priorities and intent for the 6-Year Capital Improvement Plan (CIP); and

WHEREAS, for more than two decades, the district experienced relatively steady growth in student enrollment. From 1988-89 to 2010-11, enrollment increased by about 25%. When a district has steady growing enrollment, it is appropriate to replace schools as they reach the end of their useful life and to plan to build new schools to accommodate the growth; and

WHEREAS, there are three significant reasons to reconsider the school replacement model at this time.

First, for the past 5 years, the district has experienced flat to declining enrollment. From 2010-11 to 2015-16, enrollment was down 2%. While predicting the future is very difficult, there is a general belief that flat or slightly reduced enrollment is more likely in the foreseeable future than steady growth. If the state does not come to grips with its fiscal situation, large reductions in enrollment may occur.

Second, the declines in enrollment have caused the district to have some schools that are under utilized, that is, where the school capacity is significantly larger than the student population. The Board recently adopted the goal of average utilization of between 90% and 100%. Elementary schools on average currently meet this goal but Middle and High schools are on average underutilized.

Third, in 2015, the Alaska Legislature suspended the bond debt reimbursement program until 2020. This nearly triples the cost to the Anchorage taxpayers of constructing and maintaining our schools; and

WHEREAS, because of flat enrollment, some unused capacity, and no debt reimbursement from the state until 2020, it is the appropriate time to reconsider the strategic direction of the district's capital program.

NOW, THEREFORE, be it resolved, for preparing the 2016-22 Anchorage School District Six-Year Capital Improvement Plan and for future capital planning, the Anchorage School Board provides the following guidance to the administration;

*** 2016-2020 HIGH PRIORITY SCHOOL COMPONENTS**

For the period 2016-20, the District should focus on reducing the amount of deferred maintenance across the District and prioritize life safety, critical building components (roofs, boilers, HVAC) and security in that order. School renewals or substantial replacements should only be undertaken based on substantial need, the need to use prior planning expenditures, or for projects after 2020. This “take care of what we got” strategy is appropriate for the period of no bond debt reimbursement from the state.

*** DATA-BASED ASSESSEMENT**

The District should continue to have a data-based assessment process that ranks projects based on the condition of the building from the Facilities Condition Index (FCI) and its suitability as a school using the Educational Adequacy Index (EAI).

*** 2016 SCHOOL CAPACITY STUDY**

The District should conduct an open and transparent study of school capacity and usage in order to make recommendations to the Board. These recommendations may include program changes, boundary changes, school consolidation and/or closure, as well as any other changes deemed necessary and appropriate based on the results of the study. The District may involve the CIAC in any way the two entities deem appropriate. The scope of the study is the entire district and it is not directed at any particular school or community. The District shall give all affected school communities advance notice and a full opportunity to comment. Any recommendation should reflect not only the capital cost savings of the school replacement but also the potential impact on educational outcomes, any closure costs, the affect on operating costs, the impact on the students and the community, that the foundation formula pays less per student in larger schools, and any other relevant factors. The District shall complete this study and make recommendations to the Board no later than November 2016.

PASSED AND APPROVED this 7th day of March 2016.

Introduction and Overview of CIP

I. Introduction and Overview

The Anchorage School Board is responsible for ensuring adequate educational and operational facilities for the students and staff of the Anchorage School District. To fulfill this obligation, the school board regularly engages in comprehensive long-range planning of school facility construction, renovation, and maintenance. On an annual basis, the school board adopts a Six-Year Capital Improvement Plan (CIP) that addresses capital needs, anticipated levels of student enrollment and municipal planning efforts. The CIP delineates the district's construction priorities over a six-year period.

The steps in preparing and approving the Six-Year CIP are listed below:

1. Review school board guidance and policy regarding capital planning.
2. Survey all principals to determine requirements, priorities and space utilization.
3. Collaborate with local demographer to determine enrollment projections by school and grade.
4. Obtain requirements and priorities from the district's internal Capital Planning Committee.
5. Receive administrative recommendations regarding capacity & membership projections.
6. Evaluate the Facility Condition Assessment Program (FCAP) to identify, validate and prioritize aged-out facility systems.
7. Collaborate with the municipality planning department to determine short and long range educational facility needs.
8. Collaborate with the Capital Improvement Advisory Committee (CIAC) and obtain their recommendations.
9. Present CIP to the Municipal Planning and Zoning Commission for recommendations.
10. Present CIP to the Superintendent and school board for approval.
11. Transmit adopted Six-Year CIP to the Anchorage Assembly and to the State Department of Education and Early Development (EED).

This document is divided into four major sections:

- School Facilities
- Capital Improvement Recommendations
- Student Membership Projections
- Current Facilities Utilization

The Six-Year Capital Improvement Plan is a thorough, good faith document intended to convey the Anchorage School District's planned, future investment in its infrastructure. The plan is assessed annually and is subject to modification based on evolving educational needs, changes to facility conditions within the district, and other environmental factors (to include bond passage, budgetary matters, and demographic changes) that influence priorities and contribute to a more informed six-year investment plan.

Municipality of Anchorage

Planning Department
Long-Range Planning Division

Memorandum

Date: February 16, 2018

To: Tom Fenoseff, Anchorage School District

From: *TD* Tom Davis, Senior Planner

Subject: Status of 2040 Housing Capacity Estimates by School Attendance Area

The *Anchorage 2040 Land Use Plan (2040 LUP)* was adopted by the Anchorage Assembly in September 2017. It accommodates up to 21,000 additional households in the Anchorage Bowl in order to meet forecast population needs through the year 2040. This plan also depends on forecasts of additional housing demand in Chugiak-Eagle River. Our project team is continuing the collaboration with ASD to provide updated estimates of the vacant/redevelopable land capacity for this future additional housing by school attendance area (elementary, middle, and high schools).

We are currently revising the break-down of the future housing capacity into housing types (e.g., single-family versus apartments). These break-downs should enable ASD to translate the housing capacity data into a long-term (2040) student population projection scenario by elementary, middle, and high school. In the meantime, here are some highlights from the overall housing capacity estimate that may be of interest:

1. The *2040 LUP* focuses much of the future growth on infill/redevelopment within existing central areas of the Bowl. This includes an increase of between 10,000 and 11,000 households in the vicinity of Downtown, Midtown, and UMED. The *2040 LUP* also indicates secondary growth areas including approximately 2,000 additional households along Lake Otis between Tudor and Huffman; 2,200 on the Hillside; 1,300 in the Muldoon area; 1,100 in the Sand Lake/Jewel Lake area.
2. The *2040 LUP* indicates more than 3,000 additional housing units in each of the Central, Romig, and Wendler middle school attendance areas, with Central gaining the most at 3,500 additional households. This may suggest retaining the middle school site in the Central attendance area to support city housing goals. Goldenview, Hanshew, and Clark attendance areas would each gain more than 2,000 additional households. Begich and Mears attendance areas would each gain more than 1,000.
3. The *2040 LUP* prioritizes a “reinvestment focus area” in Downtown to encourage more housing and mixed-use. The capacity estimate indicates 1,800 additional households in this area comprising the Inlet View, Denali, and Fairview elementary school attendance areas, with the majority going to Inlet View. Retaining the Inlet View elementary school site would be consistent with municipal efforts to facilitate new housing in the Downtown area. A second “reinvestment focus area,” located in Midtown/Spenard, would yield 3,500 additional households in the combined attendance areas of Willow Crest, North Star, Northwood, and Rogers Park. Approximately 1,700 of this would go to Willow Crest alone.
4. The UMED area, comprising the combined attendance areas of Airport Heights, Russian Jack, College Gate, Lake Otis, and Tudor elementary schools, would gain approximately 5,000 households.
5. Lastly, with respect to ASD’s two elementary school sites in the Bowl (Muldoon and Kincaid): 1,300 additional households would go to the area comprising Creekside Park, Muldoon, Chester Valley, and Susitna; and 1,000 would go into the combined attendance areas of Kincaid, Sand Lake, and Chinook.

School Facilities

II. School Facilities

The Anchorage School District (ASD) operates and maintains the largest physical plant of any public entity in the state, with over 7.8 million square feet worth approximately \$2 billion. The district has 92 facilities; 85 schools and 7 support facilities. There are 13 alternative and charter school programs that utilize leased facilities. The district has more than 47,000 students and nearly 5,000 staff members.

ASD has 7 (preK-5), 7 (K-5), 7 (preK-6) and 37 (K-6) elementary schools, and two K-8 schools (table A). Aurora, Mt. Spurr, Orion, Ursa Major and Ursa Minor elementary schools are located on Joint Base Elmendorf Richardson (JBER).

ASD has three middle schools grades 6-8, seven middle schools grades 7-8 and eight high schools grades 9-12 (table A).

ASD has 10 charter schools and 12 alternative schools (table A).

Special Education services are offered in all elementary and secondary schools in the district. Some schools support self-contained programs for students with more significant disabilities who require this type of setting. Tyson, Kasuun, Lake Hood, Baxter and Whaley School, are dedicated to serving students with significant disabilities that required intensive behavior support. The district also provides services at our Alternative Career Education (ACE) and Adult Community Transition (ACT) programs for students 18 – 22 who require continued transition services.

In addition, the district operates four state contract programs: Alaska State School for the Deaf and Hard of Hearing, Providence Heights, McLaughlin School and New Path High School. The district also operates special educational programs for students in eight short and long term residential facilities: Bragaw Heights, DeBarr Heights, Humphrey Heights, Jesse Lee Home, Maplewood, McKinley Heights, Providence Heights, and Turning Point Heights.

Capital Improvement Needs

Capital Improvement Needs

III. CAPITAL NEEDS

The Anchorage School District operates and maintains 92 facilities; 85 schools and seven operational facilities. The average age of district facilities is 32 years. Approximately 24% of the facilities are over 50 years old, including 6 facilities that are 60 years or older.

To properly identify and prioritize requirements across such a large physical plant, the district has implemented an integrated Facility Condition Assessment Program (FCAP). In 2009, the district initiated the development of an asset management system to assist in capital planning. Information was collected by Architect and Engineer teams during facility condition assessments utilizing a systematic and consistent methodology. Facility condition assessments have been completed for all district-owned facilities. Additionally, educational program assessments have been completed for all schools except the King Career Center. Facility assessment data is updated routinely as facility condition assessment and construction projects are completed.

Educational program requirements are defined by districtwide educational specifications for elementary, middle and high schools. An Educational Adequacy Index (EAI) determines the ability of a school to meet educational program requirements by evaluating the quantity, configuration, size, and existence of spaces defined by the district's educational specifications. For example, a school may not have enough classrooms to offer health classes, or lack a gymnasium in addition to a multi-purpose room in order to facilitate concurrent lunches and physical activity. The EAI for a facility is calculated by dividing the cost to correct the educational specification deficiency by the replacement cost of the facility. The higher the EAI, the greater the level of educational inadequacies of the facility compared to ASD education specifications.

A Facility Condition Index (FCI) is also calculated to determine a facilities relative condition and estimates the investment cost needed to address aged-out facility systems. It is a percentage index derived from dividing the cost to replace "like" aged-out building component/systems by the facility's replacement cost. The higher the FCI, the greater the level of investment needed to sustain/renew the facility. The

FCI can also be applied districtwide to measure the condition and determine the level of annual investment needed to sustain/renew the district’s physical plant.

According to the national standard, an FCI less than .05 is considered “Excellent”, .05-.10 is considered “Good” and .10-1.0 ranges from “Fair to Poor”. With an estimated ~\$2 billion Current Replacement Value (CRV) and ~\$280M of deferred unfunded sustainment backlog, the current districtwide FCI is ~0.14.

Best practice within the facility management industry is to re-invest 7% of the CRV annually for Maintenance and Operations (3%), Periodic Renewals (2%), As-Needed Alterations (1%) and Systematic Reduction of Deferred Renewals/Alterations (figure 1). For the ASD, this would equate to \$140M/year; \$60M for Maintenance and Operations, \$40M for Periodic Renewals, \$20M for As-Needed Alterations and \$20M for Systematic Reduction of Deferred Renewals.

Figure 1. National Standard for Facility Investment

Source: 2016 State of Our Schools; America’s K-12 Facilities; 1st Century School Fund, Inc., U.S. Green Building Council, Inc., and the National Council on School Facilities

The FCAP centralizes information on the district’s facility system conditions (FCI) and educational specification deficiencies (EAI). This information is reviewed and validated during routine facility assessments by utilizing systematic, consistent, and repeatable methodologies. The FCAP serves as the basis to determine capital needs, priorities, educational inadequacies, capital costs and is used to develop short and

long term capital planning and funding strategies for the district. Current and forecasted FCAP requirements and costs will be evaluated and prioritized annually based on the following criteria:

- **Category I-1 thru I-3:** year one requirements that address life safety, security, legal compliance, repair damaged/deteriorating facility to prevent loss of the facility, avoid high-cost emergency repairs and capitalize on rapid energy savings
- **Category II-1 thru II-3:** year two requirements that address educational program priorities, repairs less compelling than Priority I and deferred repairs that will lead to a loss of facility, hamper educational program or affect efficient operations
- **Category III-1 thru III-4:** year 3-5 requirements that address facility or site improvements necessary for proper functioning, economic maintenance & suitable appearance of new construction left uncompleted because of inadequate project funding, delayed deferred maintenance that can be postponed, anticipating actions for long-range planning and delayed to be combined with a future project.

Facility condition and educational program assessments highlight the following key considerations of sustaining the district's physical plant.

Building Component Life Cycle: Facility systems only last so long. Roofs deteriorate and leak; heating, plumbing, and ventilation systems wear out; and structural systems age. As components age-out, their reliability exponentially decreases and exposes maintenance and operational budgets to more emergency expenditures and increases the risk of impacting educational programs.

Functional Obsolescence: Over the life of a school, programmatic changes take place that demand updating the facility infrastructure. Current educational delivery methods require more technology and physical layouts that are often different and more flexible than those of 30 to 40 years ago. Additionally, various code changes require updating structural, electrical mechanical systems and improving accessibility for persons with physical disabilities. Moreover, significant renewals often require structural upgrades to meet more stringent seismic codes.

Capacity: the ASD is the largest school district in the state, and while its overall enrollment has been steady in recent years, the geographic distribution of students continues to shift due to the mobility of the state/city population. In order to meet short-term over-capacity situations, the district has 113 relocatable classrooms.

Capital Improvement Recommendations: 2018-24

IV. CAPITAL IMPROVEMENT RECOMMENDATIONS:

The recommended six-year capital improvement projects and their estimated project costs are reflected in Table 1. Initial project cost estimates are based on Fiscal Year 2016 DEED Cost Model with 2.5% inflation adjustments for years two through six. Adjustment to these cost estimates may be made in future years to accommodate fluctuations in construction costs and scope of work identified during initial planning or design stages of the projects.

The six-year CIP was developed through collaboration with municipal planners and extensive data-driven analysis by the Capital Improvement Advisory Committee (CIAC) and the district's internal Capital Planning Committee (CPC). The plan considers recent board guidance and policy established in 2016. This plan takes a more aggressive approach in addressing the district's deferred sustainment requirements, foregoes un-necessary large-scale renewals through the state's moratorium on debt reimbursement and addresses the district's top educational program priorities.

Table 2 provides brief descriptions of projects identified in Table 1. Table 3 identifies the agency coordination required for developing property currently managed by the district. Table 4 summarizes information from the FCAP. Table 5 identifies the district's anticipated project delivery schedule of large-scale projects that may be funded through legislative appropriations.

Definitions:

Renovation: Extending the useful life of facilities, which includes replacing worn-out or inefficient major building components, retrofitting for energy conservation, eliminating health and life safety problems, and meeting updated regulatory requirements. May also include total or partial upgrading of a facility to higher standards of quality or efficiency.

* Due to ASD's ongoing "Capital Efficiency Study", project scope, costs, and priorities are subject to change and will be adjusted based on recommendations of the study.

Projects identified as potential 2019 and 2020 "Deferred Requirements Projects" are the highest prioritized projects-to-date on ASD's Facilities Unfunded Needs List. Cost estimates as noted reflect a cursory level of scoping and are subject to change based on future re-prioritization and detailed scoping efforts.

**Table 2
2018-2023 CIP Project List**

Project Title	Scope of Work	Project Cost	CIP Year
Capital Improvement Projects			
East High School Planning & Design (Academic Area Safety & Pool Safety Improvements)	Planning & design funding to address missing fire suppression system in unprotected areas, structural/seismic improvements, updated lighting, and address accessibility in toilet rooms.	\$1,305,000	1
Inlet View Elementary School Renovation (Emergent Component Replacement) Design & Construction	Design and construction funding to address structural deficiencies; provide sprinkler system for fire protection; replace critically aged components such as exterior window and wall assemblies, boilers, mechanical controls, ventilation, lighting; and improve front office security.	\$6,529,000	2
Wonder Park Elementary School Renovation (Emergent Component Replacement) Design & Construction	Design and construction funding to address structural deficiencies; replace critically aged components such as roof, exterior window and wall assemblies, heating piping, and ventilation; renovate restrooms and enclose open classrooms to address program deficiencies.	\$10,143,000	2
Romig Middle School Renovation Design & Construction	Design and construction funding to address building improvements as identified in the School Board approved "West High School & Romig Middle School Implementation Phasing Plan (September 4, 2015)."	\$24,333,000	2
Homestead Elementary School Renovation Planning and Design	Planning funding to address code deficiencies; replace critically aged components and address program deficiencies.	\$500,000	3
Gruening Middle School Renovation (Emergent Component Replacement) Design & Construction	Construction funding to replace aged components such as roof, exterior doors and windows; repair and refinishing exterior; retro-commission the mechanical system; repair paving and drainage; reconfigure bus loop/drop-off to improve safety; and address program deficiencies in special education, science and front office security.	\$10,427,000	3
Mears Middle School Renovation Planning & Design	Planning funding to address code deficiencies; replace critically aged components; and address program deficiencies.	\$500,000	3
East High School Construction (Academic Area Safety & Pool Safety Improvements)	Construction funding to address missing fire suppression system in unprotected areas, structural/seismic improvements, updated lighting, and address accessibility in toilet rooms.	\$13,135,000	3
O'Malley Elementary School Renovation (Emergent Component Replacement) Design & Construction	Construction funding to address structural deficiencies; replace critically aged components such as exterior window and wall assemblies, cabinet unit heaters, exhaust fans, mechanical controls, water mains, electrical, lighting; intercom, security system, and septic drain field; renovate main restrooms; and improve front office security.	\$20,244,000	4
Central Middle School Renovation (Emergent Component Replacement) Design & Construction	Construction funding to address structural deficiencies; replace critically aged components such as roof, exterior window and wall assemblies, cabinet unit heaters and interior lighting; and repair paving to improve site accessibility.	\$20,589,000	4
Homestead Elementary School Renovation Design & Construction	Construction funding to address structural deficiencies; replace critically aged components such as exterior window and wall assemblies, cabinet unit heaters, exhaust fans, mechanical controls, water mains, electrical, lighting; intercom, security system, and septic drain field; renovate main restrooms; and improve front office security.	\$12,694,000	5
Mears Middle School Renovation Design & Construction	Design and Construction funding to address code deficiencies; replace critically aged components; and address program deficiencies.	\$42,608,000	5
Whaley School Renovation Design & Construction	Design and construction funding for building improvements to support educational program and for component replacement of aging systems.	\$29,730,000	6
Deferred Requirements Projects			
Abbott Loop Elementary School Fire Suppression	Install missing fire suppression system to protect occupants and facility.	\$3,960,000	1
Birchwood Elementary School Roof Replacement	Replace the entire roof over the building. The existing roof was installed in 1994 and is failing. The work will include structural/seismic improvements.	\$4,428,000	1

**Table 2
2018-2023 CIP Project List**

Deferred Requirements Projects	Scope of Work	Project Cost	CIP Year
Homestead Elementary School Roof Replacement	Replace the entire roof over the building. The existing roof was installed in 1990 and 2004; the roof sections are failing. The work will include structural/seismic improvements.	\$5,890,500	1
Mears Middle School Roof Replacement	Replace the entire roof over the building. The existing roof was installed in 1984 and is failing.	\$9,990,000	1
North Star Elementary School Roof Replacement	Replace the roof sections installed between 1986 and 1995; these roof sections are failing. This work will include structural/seismic improvements.	\$5,593,500	1
Ptarmigan Elementary School Partial Roof Replacement	Replace the roof sections installed between 1996 and 1998; these roof sections are failing. This work will include structural/seismic improvements	\$3,910,500	1
Roof Improvements at 7 Prototype Elementary Schools - Kincaid, Northern Lights ABC, Bowman, Trailside, Russian Jack, Kasuun, & Lake Hood	Roof drainage systems were installed as part of original construction, which vary from 1991 to 2000. These systems are ponding in the custom perimeter gutters. This issue has caused damage to interior walls, soffits, and interior finishes to buildings. This work will correct these deficiencies. This scope of work also includes replacement of failed low slope roof sections at one school.	\$3,528,000	1
East High School Gym Safety	Install missing fire suppression system in unprotected areas to protect occupants and facility. The work will include structural/seismic improvements, new fixtures, updated lighting, upgrade finishes and improve ADA requirements in toilet rooms.	\$6,021,000	1
Service High School Fire Suppression	Install missing fire suppression system to protect occupants and facility.	\$6,030,000	1
Deferred Requirements Projects	Life Safety, Building Component, Energy, & Security Projects- Scope of Work Below	\$18,995,000	2
Government Hill Elementary School Roof & HVAC Upgrade	Replace the entire roof over the building. The existing roof was installed in 1995 and 2000 and is failing. The work will include structural/seismic improvements. Replace existing cabinet unit ventilators with new centralized heating/ventilation system and improve air flow.	See Deferred Requirement Projects-Year 2 for subtotal	2
Eagle River Elementary School Roof Replacement	Replace the entire roof over the building. The existing roof was installed in 1984 and 2005 and is failing. The work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 2 for subtotal	2
Warehouse-Purchasing Roof Replacement	Replace the entire roof over the building. The existing roof was installed in 2000 and is failing. The work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 2 for subtotal	2
Bear Valley Elementary School Domestic Water Improvement	Replace the existing domestic water system though out the entire building. The system was installed in 1984 and is failing. This work includes replacement of fixtures and water tank.	See Deferred Requirement Projects-Year 2 for subtotal	2
Chinook Elementary School Roof Replacement & Restoration	Replace the low sloped roof sections installed between 1994 and 2003; these roof sections are failing. Roof restoration for roof sections with built-up roof assembly. This work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 2 for subtotal	2
Taku Elementary School Roof Restoration	Roof restoration for roof sections with EPDM roof assembly, installed between 1989 and 1998.	See Deferred Requirement Projects-Year 2 for subtotal	2
Ursa Minor Elementary School Roof Restoration	Roof restoration for all roof sections with EPDM roof assembly, installed in 1998.	See Deferred Requirement Projects-Year 2 for subtotal	2
Planning & Design for 2020 Deferred Requirement Projects	Funding for planning and design for deferred requirement projects in 2020.	See Deferred Requirement Projects-Year 2 for subtotal	2
Deferred Requirements Projects	Life Safety, Building Component, Energy, & Security Projects- Scope of Work Below	\$35,438,000	3
Alpenglow Elementary School Partial Roof Replacement	Replace the low sloped roof sections installed in 1994; these roof sections are failing. This work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 3 for subtotal	3
Spring Hill Elementary School Roof Replacement	Replace the entire roof over the building. The existing roof was installed between 1984 and 2003 and is failing. The work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 3 for subtotal	3

**Table 2
2018-2023 CIP Project List**

Deferred Requirements Projects	Scope of Work	Project Cost	CIP Year
Aurora Elementary School Roof Replacement, Roof Restoration & Boiler Replacement	Replace the low sloped roof sections installed 1997; these roof sections are failing. Roof restoration for roof sections with EPDM roof assembly. This work will include structural/seismic improvements. Replace the existing boiler installed in 2005 and is failing.	See Deferred Requirement Projects-Year 3 for subtotal	3
Campbell Elementary School Partial Roof Replacement	Replace the roof sections installed between 1986 and 1995; these roof sections are failing. This work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 3 for subtotal	3
College Gate Elementary School Roof Replacement	Replace the entire roof over the building. The existing roof was installed between 1994 and 1996 and is failing. The work will include structural/seismic improvements.	See Deferred Requirement Projects-Year 3 for subtotal	3
Kasuun Elementary School Partial Roof Replacement	Replace the high-low sloped roof sections. These roof sections were installed in 1996 and are failing.	See Deferred Requirement Projects-Year 3 for subtotal	3
Lake Hood Elementary School Partial Roof Replacement	Replace the high-low sloped roof sections. These roof sections were installed in 1996 and are failing.	See Deferred Requirement Projects-Year 3 for subtotal	3
Maintenance Building Roof Restoration	Roof restoration for roof sections with EPDM roof assembly, installed between 1997.	See Deferred Requirement Projects-Year 3 for subtotal	3
Planning & Design for 2021 Deferred Requirement Projects	Funding for planning and design for deferred requirement projects in 2021.	See Deferred Requirement Projects-Year 3 for subtotal	3
Deferred Requirements Projects	Life Safety, Building Component, Energy, & Security Projects	\$19,167,000	4
Deferred Requirements Projects	Life Safety, Building Component, Energy, & Security Projects	\$9,698,000	5
Deferred Requirements Projects	Life Safety, Building Component, Energy, & Security Projects	\$35,270,000	6

- Original Construction - Year the facility was built
- Last Major Improvement - Most recent year that a significant improvement was made on the facility
- Square Footage - Facility size based on gross square feet
- EAI Evaluation Model - Designation of metric utilized for the facility's educational assessment of instructional spaces. Unless noted "Special", model is based on Districtwide Educational Specifications (Draft 4/2011) adjusted to population trends, or existing Master Plans.
- Deficiency EAI - A percentage index derived from dividing the cost to correct instructional space's deficiencies by facility's replacement cost
- Missing Spaces EAI - A percentage index derived from dividing the cost to provide the missing instructional space by facility's replacement cost
- Total EAI - A percentage index derived from the summation of the Deficiency EAI and Missing Space EAI
- FCI - A percentage index derived from dividing the cost to correct building component/system needs by the facility's replacement cost

* The % Capacity is adjusted for half-time day programs for SAVE and Benny Benson.

Yellow shade: EAI and FCI to be updated upon project completion

Membership Projections Summary: 2018–19 to 2023–24

V. Membership Projections Summary: 2018 to 2023

Forecasting Methodology and Assumptions: The principal method used to project the 2018 through 2023 enrollment is an econometric model which combines cohort-survival technique with a GIS-enabled database of school age children based on PFD data. For each school and grade there is an underlying statistical relationship derived from comparing historic enrollment with historic cohort survival and PFD counts. Cohort survival accounts for historical retention trends for each individual school and grade. Counts of eligibility based on PFD data aid projections when cohorts have not matriculated into the district, and historical enrollment data is unavailable.

After running initial statistical models, results for each school and grade level projection are assessed to ensure that the results are supported by underlying historical patterns or, if there is a change in pattern, that the change is supported by shifting demographic or economic factors.

ASD projections contained in this document do not reflect the impact of any major events occurring in the next six years that would be considered speculative: construction of the natural gas pipeline, opening of ANWR for oil exploration, closure or expansion of military installations; major changes in the state's economic or political structure. It is assumed, however, that oil and mineral exploration will continue in Alaska throughout the decade. It is also assumed that other industry and commercial sectors in Anchorage will continue to track overall economic activity levels, and their employment levels will affect ASD membership.

Past 2017 Enrollment: From fall of 2016 to fall of 2017, the Anchorage School District experienced a sharp decline in enrollment of over 600 students. While past projections suggested a decline in enrollment, several factors are thought to have exaggerated losses:

- U.S. Unemployment: When jobs are abundant in the contiguous United States, net outmigration from Alaska generally increases. There have been three other instances from 2000 to 2017 when enrollment declined by over 600 students ('06, '07, '13). During 2006 and 2007 enrollment lows, the U.S. unemployment rate was also remarkably low. In 2017, US unemployment dropped lower than it has in over a decade to just over 4 percent;
- Alaska's Recession and Population: The severity of Alaska's recession slowed slightly in 2017 compared to 2016, but actual net outmigration may lag employment indicators;
- Correspondence Schools: Transfers from the ASD into statewide correspondence programs increased 61 percent from 151 to 244 between the 2015–16 and 2016–17 school years;

- Activities at JBER: In August, the U.S. Army announced that it will be deploying the 4-25th Brigade, comprising some 2,500 soldiers, to Afghanistan in September of 2017.

2018 to 2023 Enrollment Projections

Barring significant improvements in Alaska’s economic landscape and/or a weakening U.S. employment picture, we expect moderate net student losses to continue into 2018 because of the negative and positive drivers detailed below:

- 330 fewer 2016–17 qualifying births were reported compared to 2015-2016 figures;
- a general decline in past enrollment since the late 2000s;
- 145 fewer school age Anchorage PFD applications in 2017 than in 2016, and additional 138 fewer applicants that will become school age in the next one to four years;
- the deployment of JBER’s 4-25th likely influenced 2017 enrollment. However, the return of those soldiers, or new soldiers cycling in after deployment, might have a positive effect on enrollment in 2018.

Elementary school estimates show steady declines from 2017 to 2019 (-0.8%), due to attrition and recent drops in corresponding PFD applications. However, elementary school attendance is projected to flatten from 2019 to 2020 because of higher birth rates and PFD cohort applications associated with those years before continuing a decline from 2020 to 2023 (-2.6%).

Note: Does not include alternative, charter, or special schools.

The increase in enrollment in 2015 came from larger-than-average high school cohorts, paired with the arrival of marginally larger elementary school classes. Middle school projections continue to show increases (2.3%) in attendance into 2020 because of this larger than average cohort moving through past grades, but a 3.5% decline in middle school attendance is expected from 2020-2023 once the cohort passes.

Note: Does not include alternative, charter, or special schools.

A decrease in high schools is expected (-1.4%) by 2019, but high schools will likely see an increase of up to 2.9% from 2019 to 2023 due to the aforementioned cohort moving from middle school to high school.

Note: Does not include alternative, charter, or special schools.

The net effect across all grades is an estimated decline of 1.4% from the fall of 2017 to the fall of 2023.

Note: Includes alternative, charter, and special schools.

Decreased enrollment in elementary schools could drive decreased classroom and staff requirements for those grades. Enrollment increases in middle schools might require additional classroom staff in the short term. Eventually, after larger cohorts move through middle schools by 2020, classroom staff requirements will shift into high schools.

The enrollment projections are a base case that considers past student enrollment, birth data, and school age PFD applications. Overall employment in Anchorage has declined around 1.7% from 2016 to 2017. Recent declines have prompted the forecast to trend downward on average; however, it is still not fully known how the current economic climate will affect the school age population. The district will continue to monitor employment and enrollment trends, updating projections if a significant deviation from current trends begin to occur.

Note: Intensive special ed students are included.

Current Facilities Utilization

VI. Current Facilities Utilization

DEED Capacity: Alaska Department of Education & Early Development (DEED) calculates allowable space based on Anchorage’s attendance area. Allowable space is calculated based on the total number of students/total gross square footage in the attendance area.

Program Capacity: The district utilizes Educational Specifications and Administrative “Guiding Principles” to determining the program capacity of each school. It considers all educational programs, maximum student occupancy, support requirements and schedule flexibility. Relocatables are not included in determining program capacities.

Facility Utilization: Annually, principals are surveyed to determine their school’s utilization capacity to reflect how the school is “actually” utilizing their space to support their academic program. When comparing against program capacity, this survey provides the Administration a tool to determine efficient use of all ASD schools.

School Program Capacity Projections: Table 16 lists projected enrollments of all schools over the next six years, as a percentage of program capacity. Those schools at which the projected enrollment is greater than 100 percent are highlighted in bold print.

APPENDIX A

Appendix A provides a list of schools, including charter schools, that have opened, closed or have been replaced as of 1996. It also contains basic information which describes the current status of each school facility, including: the year of original construction with gross square footage, year and description of any additions with gross square footage, as well as demolition and replacement facilities.

Schools that Opened, Closed, or Were Replaced or Renewed Since 1996

	School Name	Year Built or Opened	Year Replaced or Renewed	Year Closed
Opened Since 1996	Alaska Native Culture Charter	2008	moved 2013
