

★ Find 1 More

1 More

● Find Number Pairs

6

and

7

and

★ **Have children find 1 more.** Have children count and write the number of rockets, then draw one more and write the new total. Next, repeat with the number of plants..

● **Have children tell the different numbers that make up the same kind of item.** Ask children to circle two groups that make up 6 items altogether and write how many in each group. Repeat with drawing a rectangle around groups that make 7.

✿ Make 10

_____ and _____

_____ and _____

✿ **Have children make 10.** First, have children count and write the total number of dogs. Then have them write how many more would be needed to make 10 dogs.

Next, have children count and write the number of dinosaurs. Then have them write how many more would be needed to make 10 dinosaurs.
